DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Fieni (3,795,274). See fig. 3, 13, 16a, 10, and 4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13, 14, 17, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fieni in view of Uglietto (5,406,937). Fieni discloses all of the limitations of the claims except for front, rear, and top flanges extending from respective edges. Uglietto discloses the presence of a front, rear, and top flanges extending from respective edges. See 16, 18 and 26, respectively. Hence, one skilled in the art would find it obvious to modify the system of Fieni to include the front, rear, and top flanges extending from respective edges of Uglietto for the purpose of increased stability. Regarding claim 14, see 70 and 72.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fieni in view of Monroe (3,867,981). Fieni discloses all of the limitations of the claim except for the top edge

Art Unit: 3749

being shorter than the lower edge. Monroe discloses the presence of a top edge being shorter than the lower edge. See col. 2, lines 6-11. Hence, one skilled in the art would find it obvious to modify the system of Fieni to include the top edge being shorter than the lower edge of Monroe for the purpose of increased compact ability.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the connecting edge must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
